- Watching YouTube

ABOUT ME

I am excited to say that, I have done thousands of hours of coding and DSA practice with proficient knowledge in Java back-end development. I am a very enthusiastic and proactive person for learning new things and I am also good at teamwork and time management. I have built projects with teams and have major contributions to them.

PROJECTS

Tender Management System(Individual)

4 days project

This is a working project of managing tenders where the admin can release tenders and vendors can bid against every tender.

[github.com/tender-management](https://github.com/jagatjit15/tender-management)

My Responsibilities:

- Creating different classes for respected tasks
- Creating respected data tables in database
- Creating a responsible connection between them

Tech Stacks:

- Java
- MySQL
- JDBC

YouTube clone (Individual)

3 days project

This is not exact clone of YouTube but some kind like that you can search and watch video here and also see trending short videos

github.com/jagatjit15/YouTube_clone

My Responsibilities:

- Searching functionality
- Created buttons for sorting videos according to types
- showing trending videos on home page

Tech Stacks:

- JavaScript
- HTML & CSS
- API

Sugar Cosmetics Clone (Team project)

7 days Project

This is a clone of an existing E-commerce website where women buy their cosmetic products. We are 6 people in our group and everyone has contributed to it.

github.com/jagatjit15/Sugarcosmetic

My Responsibilities:

- Filtering according to products type
- Sorting according to price
- Cart page UI and functionalities like adding, removing, and total price

Tech Stacks:

- JavaScript
- HTML & CSS
- JSON
